# OCEAN-BOOK

Sustainable fabric cover made from recycled ocean plastic.  
In five colors with elastic band, pen loop and recycled content.

## i Ocean-Book - Its speciality

The „Wave“ cover of our Ocean Book contains yarns that are made from, among other things, plastic found in the sea. The collected plastic waste is pressed into granulate in a mechanical process and then spun into yarn. The resulting book cover fabric has a very high-quality feel and is woven from 100 % recycled PET waste, of which 55 % is plastic recovered from the sea, and coated with water-based acrylic. As a result, the cover material is also highly durable.

Are you looking for an exceptional and sustainable book cover with a strong environmental message? In combination with its content pages made from 100% recycled paper with the „Blauer Engel“ environmental label, the Ocean Book is just the right choice.

Ocean-Book A5 including screen printing digital

### NEW

# ORGANIC-BOOK

Sustainable product with vegan cover made from 39 % apple scraps and recycled content.  
Six variants with elastic band and pen loop.

## Made from parts of the apple

The organic book with the sustainable cover **appleorganic**

Our **appleorganic** cover collection is a further step in the development of an ecologically sustainable range that appreciates and respects the value of nature. Apple scraps and peel form the main component of this cover material, which uses a special manufacturing process to create an exceptional and sustainable raw material base from the fruit parts that are normally disposed. During the manufacturing process, the valuable apple scraps are dried and ground into powder, which forms the basis for our environmentally friendly and hard-wearing **appleorganic** natural covers.

We now offer a large number of our calendars and books with the innovative **appleorganic** cover in addition to the already familiar sustainable cover materials. And in up to 6 attractive colors.

Resource-saving, ecological, sustainable!
